

JUAN ARTURO CAMARILLO GUTIÉRREZ

Java Backend Developer | Spring Boot | REST APIs | PostgreSQL / MySQL | Docker

Aguascalientes, Mexico | +52 449 157 6046 | camarillo.g.juan@gmail.com

[linkedin.com/in/juan-camarillo-gutierrez](https://www.linkedin.com/in/juan-camarillo-gutierrez) | github.com/JuanCG115 | juan-camarillo-dev.vercel.app

PROFESSIONAL SUMMARY

Java Backend Developer (Java 17+, Spring Boot 3) with an Oracle Next Education specialization and OCI Foundations Associate certification. Designs secure REST APIs (Spring Security, JWT) with PostgreSQL and MySQL persistence (JPA/Hibernate, Flyway), unit tests with JUnit and Mockito, and reproducible environments with Docker Compose. Backend Lead of a 7-person cross-functional team at the No Country hackathon, integrating the API with a Machine Learning service. 7 projects published on GitHub.

TECHNICAL SKILLS

Programming: Java 17+, Python (foundational: OpenCV, requests, BeautifulSoup), C# (.NET)

Backend: Spring Boot 3, Spring Data JPA, Hibernate, REST APIs, Microservices, Bean Validation, Global Exception Handling, OOP, SOLID Principles, Clean Code, Java Streams, Lambdas

Databases: PostgreSQL, MySQL, SQL, Flyway Migrations, Data Modeling & Optimization

Security & Testing: Spring Security, JWT, Authentication & Authorization, JUnit 5, Mockito, Unit Testing

DevOps & Tools: Docker, Docker Compose, Oracle Cloud Infrastructure (OCI), Linux/Unix, Git/GitHub (Git Flow, Pull Requests, Code Reviews), Maven, Postman, Insomnia, CI/CD (concepts)

Methodologies: Agile / Scrum, Requirements Analysis, Collaborative Teamwork

Spoken Languages: Spanish (Native); English B2 (technical: fluent reading of documentation and technical communication)

PROJECTS

TechMind Engine – Technical Resource Recommender with ML | No Country Hackathon (ONE G9) | Jul 2026 – Aug 2026

Java 17, Spring Boot 3, JPA, Flyway, MySQL, FastAPI, React · github.com/No-Country-simulation/g9-latam-team19-techmind

- Led backend development for a cross-functional team of 7: designed the REST API (7 endpoints, 4 entities) with Spring Data JPA, Flyway, and MySQL.
- Integrated the API with a Machine Learning service (FastAPI) that classifies technical content and generates recommendations, persisting results idempotently in MySQL.
- Opened 14 Pull Requests and reviewed and approved 6 on GitHub under Scrum (4 weekly sprints); oversaw technical integration with the React frontend. Solution deployed on Oracle Cloud (OCI) with HTTPS.

ForoHub – Forum REST API with JWT Authentication | Alura / Oracle Next Education Challenge | 2026

Java 17, Spring Boot 3, Spring Security, JWT, Spring Data JPA, MySQL, Flyway, Bean Validation · github.com/JuanCG115/ForoHub

- Implemented authentication and authorization with Spring Security and JWT, protecting 6 endpoints for authenticated users.
- Built topic CRUD with pagination, course and year filters, and duplicate validation; modeled 5 entities and versioned the schema with 4 Flyway migrations.

Inventory Management API – Containerized Inventory API | 2026

Java 17, Spring Boot 3, Hibernate, PostgreSQL, JUnit 5, Mockito, Docker, Docker Compose · github.com/JuanCG115/inventory-management-api

- Developed a REST inventory API with data validation and global exception handling (structured 400 errors).
- Wrote unit and service-layer tests with JUnit 5 and Mockito, runnable inside Docker containers.
- Containerized the API and PostgreSQL with Docker Compose (persistent volume, environment variables) to start the full stack with a single command.

Other projects: E-Commerce API (Spring Boot, Spring Security/JWT, PostgreSQL, Docker Compose), Facial-Recognition Attendance System (Python, OpenCV; course-based), LiteraLura (Gutendex API consumption, PostgreSQL, Streams), and 3D Software Rendering Engine (C#; tutorial-based, extended) · github.com/JuanCG115

PROFESSIONAL EXPERIENCE

Process Engineering Intern | Flex | May 2023 – Nov 2023

- Analyzed processes, optimized workflows, and resolved technical incidents in operational environments.

Software Developer | Centro de Investigaciones en Óptica (CIO) | Sep 2022 – Jan 2023

- Designed and administered relational MySQL databases (6 tables) for secure processing of corporate information.
- Developed Java applications and web solutions aligned with the center's technical requirements, used by 4 departments.

EDUCATION & CERTIFICATIONS

Backend Java Specialization | Alura Latam / Oracle Next Education (ONE) | Jul 2025 – Jun 2026 | 400+ hours

Oracle Cloud Infrastructure (OCI) Foundations Associate | Oracle University | Sep 2025 – Sep 2027

B.S. in Robotics Engineering | Universidad Autónoma de Aguascalientes | Aug 2018 – Dec 2022
